About Our Patented AdjustRight® Feature

The patented AdjustRight® feature allows for easy installation through the adjustment of an internal locking rotating sleeve at both the gooseneck / crossbar and upright / crossbar connections. This adjustment can easily be repeated throughout the life of the football goal post ensuring proper alignment of all components for years of competition and all with the added benefit of no exposed hardware on the face of the goal and more importantly, no locking roll pins! Thermal arc sprayed internal textured mating surfaces, a triangular bolting pattern and anti-vibration enhancements such as serrated washers and nyloc coated bolt ends ensure the Sportsfield Specialties AdjustRight® Football Goal Posts remain in position.

U.S. Patents: #7,014,578; #7,883,432; and #7,914,401

AdjustRight® Upright Alignment Technology is guaranteed to ease installation and allow for adjustment throughout the life of the product!
